

The background of the entire page is a high-angle, blue-tinted photograph of a complex industrial facility. It features a dense network of pipes, walkways, and structural elements. In the center, there is a white rounded rectangle containing the company logo. Below this rectangle, there is a horizontal row of five small, dark blue rectangular blocks of varying lengths. At the bottom of the page, there is a solid dark blue horizontal bar.

Industrial Plants

EQUIPPED FOR THE FUTURE

THE COMPANY

C.O.I.M. is a **reliable and punctual partner** in any design, manufacturing and servicing need for **industrial plants**, thanks to its well established team of engineers and high profile technicians, as well as precise quality and customer care policies.

Created by Marco Guzzon — who had a long personal and familiar professional experience — C.O.I.M. flanks its client with several services: **procurement, design and planning, prefabrication, installation** of equipment and piping systems, metallic carpentry, machineries.

QUALITY, SAFETY, CERTIFICATIONS

Newly planned Manufacturing Quarters

2023/24

Head Quarters

All C.O.I.M. technicians and workers have **certificates for highly specialized processes**, machineries and worksite vehicles.

Safety, in facts, is the focus of each C.O.I.M. project; it is the first, irrevocable principle which allows to provide only high-standard services. The company invests on **continuing education** and safety policies in compliance with applicable regulations.

Design, manufacturing and servicing for industry

Chemicals

Food

Pharmaceuticals

Energy

Petrochemicals

Continuous investments in staff **education**, innovative equipment and new software, make C.O.I.M. able to address the most complex requirements, ensuring timekeeping and precision.

C.O.I.M. is **strategically placed** at the intersection of the main north-western Italian routes: its headquarters cover 3500 m² plus newly planned manufacturing quarters of 1500 m².

Quality has a central role; on an annual basis C.O.I.M. **undergoes internal**, quality certifications, and client's audits.

DESIGN

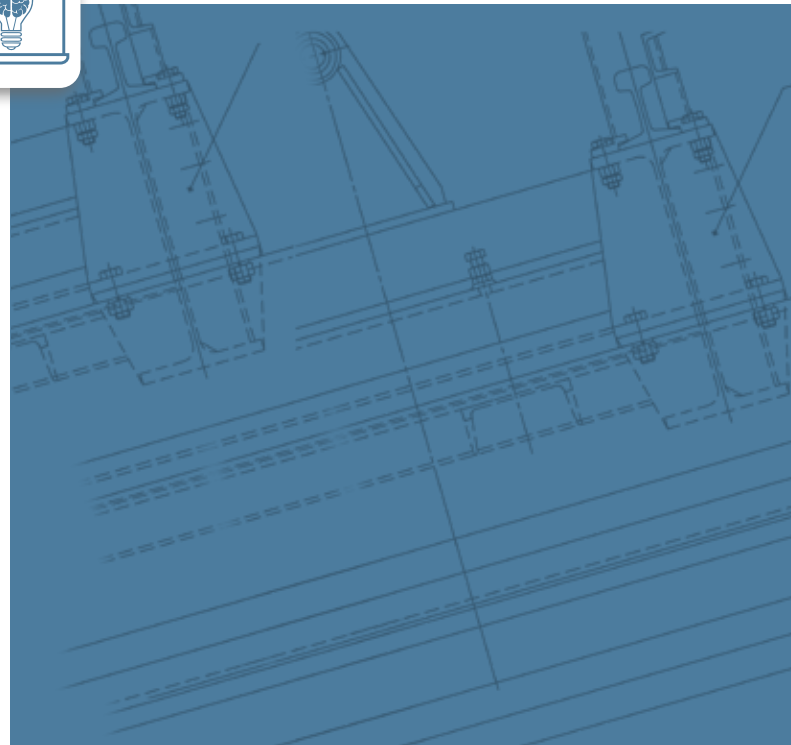

C.O.I.M. design method focuses on translating the client needs into a systems project with the best outcome by applying **precise management and planning tools**. The design and project management activities are carried out thanks to a team made of highly reliable designers, engineers and project managers.

C.O.I.M. ensures:

- compliance with the highest **quality standards**;
- project coordination for **efficient** activities;
- **cost-effectiveness** optimization;
- **timeline** compliance.

Starting from a preliminary analysis, C.O.I.M. develops the whole project or it flanks the clients' designers, always **focusing on detail**. International technical standards and safety regulations are kept through cutting-edge calculation, design, and engineering softwares.

MANUFACTURE

Thanks to its high qualified team and state of the art technologies, C.O.I.M. is a reliable partner for industrial systems manufacturing, from **prefabrication** to on-site **assembly**. Operations are specially carried out by paying attention to deadlines, taking advantage of in-house equipments and vehicles.

By means of equipped mobile workshops, C.O.I.M. offers:

- **pipng systems** manufacturing and assembly;
- **specialized mechanics**;
- systems **installation**;
- systems **insulation**;
- **skids** prefabrication;
- **metallic carpentry**.

Three key assets guarantee quality in all operations: technicians and workers high-level qualification, cutting-edge technologies, and a wide privately owned vehicle and lifting equipment fleet (access platforms and telescopic handlers), chosen to meet different needs and environments.

INDUSTRIAL PRESSURE VESSELS

SERVICING

C.O.I.M. offers a qualified systems and plant maintenance service, to meet any client needs. Thanks to its **mobile workshops**, C.O.I.M. **ensures timely assistance and continuously monitoring** of the plant. Promptness that is further strengthened by customized procurement contracts (H24, 7/7).

C.O.I.M. specializes also in pressure vessels **design** and **manufacturing**, with a wide range of solutions for any industrial need, making models with different capacities and functions. Designs are always **custom-made** with state of the art softwares, and assembly is managed in order to meet safety and high quality standards.

Among the pressure vessels:

- tanks;
- reactors;
- exchangers;
- pressure filters.
